Home, salty home

 **WHAT:** Marine **macrophytes**, such as seagrasses and macroalgae provide food and **habitat** to marine life. Small **invertebrates**, such as crustaceans and mollusks, live in macrophytes

 **WHY:** Macrophytes and invertebrates provide the foundation for healthy coastal ecosystems.

 **Can you find us?** Circle the invertebrates you can find in the picture below

My mollusk or crustacean

Who is your favorite mollusk or crustacean? Draw it in its habitat, name it, and write a story about what happens in one day in the life of your mollusk or crustacean friend.

My story
